

# FIFO

## Mobile Dental Treatment Centre

Designed to be the ultimate blend between functionality and performance the FIFO ( Fly in Fly Out ) offers you everything you need to perform clinical treatments in a portable case. The super strong, robust case comes with its own built in oil free compressor and high volume suction motor that is capable of running a high velocity and saliva ejection lines. The built in LCD display gives you access to all of the unit settings like micro motor speed control and scaler intensity as well as offering you reminders on when you next service is due. The William Green FIFO is designed in Australia for Australian conditions and like all William Green equipment is built to last. Fully plug and play means that all that is required is a normal powerpoint.

Designed with serviceability in mind the FIFO features handpiece lines that are detachable via a quick connect style system which does not require a dental service engineer to swap out in case of repair. With infection control being such an important part of all modern

equipment the FIFO has been designed to include smooth surfaces to aid in easy decontamination as well as having fully autoclavable handpiece hangers and syringe handle If you are looking to perform dental treatment away from the dental operatory then the FIFO is you ultimate partner.

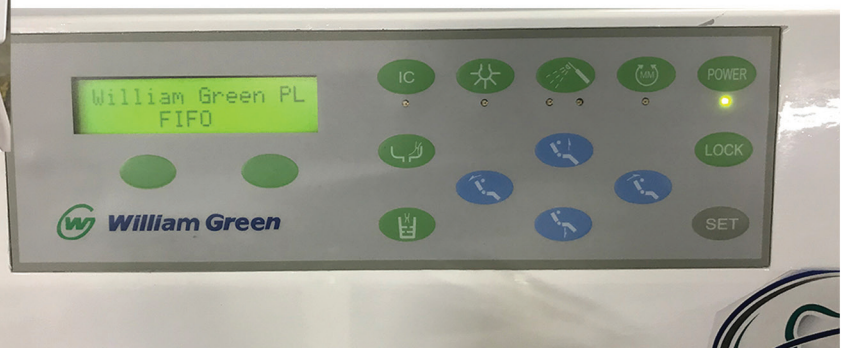

## Featuring:

- \* Built in oil free compressor
- \* Built in high velocity suction line( 290l/m )
- \* Built in saliva ejector line.
- \* Autoclavable Triplex Syringe.
- \* BienAir brushless fibre optic micromotor with speed control
- \* EMS painfree LED scaler
- \* Selfcontained clean water system 1.25L
- \* Robust transportable crush proof case
- \* Unit weighs only 12kg

- \* LCD display with date and time functionality
- \* Programable handpiece lines, air, water speed functions
- \* Removable handpiece lines for simple maintenance.
- \* Autoclavable hand piece hangers for high level of infection control.
- \* Smooth, no seam design for ease of cleaning.
- \* Adjustable suction power control
- \* large 2L waste collection canister.

## Technical Details :

Size: 500 x 300 x 300 mm  
Weight: 12 kG  
Suction: 290L/m  
Clean water: 1.25L  
noise: 46dB
