Automated Post-Processing Saves
Time and Effort

Why Go Digital?

A Smart Business Decision

The Digital Workflow

Fast, Accurate, Versatile

Proven, Safe Solutions

Reduce the risks and uncertainties introduced by human factors. Deliver faster treatments, fewer visits, and higher prosthetic acceptance rates.

Ease of Use

Today's digital technology is reliable and intuitive. Advanced 3D printers have clever features like automatic resin dispensing so you can reclaim your time.

Improved Efficiency

Save time and costs. Reducing menial tasks means shorter appointments and increased throughput, while handling some production in-office cuts costs.

Flexible Communication

Improve relationships on all sides. Cut lab lead times with digital file transfer, and use your printer to plan or illustrate complicated cases to patients.

Fully Validated Indications

Fast, Accurate, Versatile

Dental Master Models

\$2-4 USD PER MODEL
Average print time:
1hr per model set
1.5hr full build platform

Diagnostic Models

\$4-6 USD PER MODEL
Average print time:
2.5hr per model set
5.5hr full build platform
