

Mobile Dental Clinic Trailer

William Green now offer an equipment package that can be hitched up and taken on the road with you allowing you to access patients that find it difficult or inconvenient to come to you. There is a growing demand for geriatric care that is often difficult to access and the William Green mobile dental clinic addresses this demand. Designed to be a fully self-contained dental clinic the mobile surgery

has a waiting room, separate sterilisation area, plenty of storage and can run from mains power input or from the self-contained generator. Fully air conditioned with a bright interior you won't even realise you're in a mobile clinic. The mobile dental clinic is available in a variety of configurations and can be built to you specifications. At under 3t GMV it can be easily toed by a wide variety of vehicles and does not require any special licence and as the initial capital outlay does not include the cost of buying a truck and chassis it becomes a very economical alternative.
