

The choice of the perfect stool is central to the professional's health. Tecnodent has always been dedicated to developing professional and ergonomic stools, which allow the dorsal spine to maintain its natural posture with a proper and harmonic distribution of body weight to prevent pressure pain.

**EGG&Sting** stools line is designed to offer the highest comfort to professionals and patients in every field.

**EGG R** is a great everlasting classic. All mechanisms are covered in integral polyurethane, which gives long lasting duration, resistance and hygiene. Revolving "U"- shaped backrest properly sustains the back and provides a comfortable support to the professional's arm. The backrest can be rotated from right to left, making it very useful both for right and left handed professionals. Extremely compact **EGG R** base makes it particularly suitable for little spaces.

**EGG Iron** stool, with its essential and eternal design, pleasantly suits every cabinets and furniture style.

Sting line stools are created to fit the needs of those professionals who stay seated for several hours. The saddle-shaped seat allows the legs to maintain the correct "V" position, for an optimal body posture, which releases dorsal spine from aches and improve circulation.
